

Cape Fear Grower Guide APPLICATION – FARM PROFILE

Please complete the information requested and submit in order for your farm listing to be included in the Cape Fear Poultry Growers Group publication. **The website will be updated monthly to include any farmer who has submitted a farm profile.**

A photograph of your farm will be included in your farm profile. Please take picture on a bright day and include your family. Your family should look neat and well dressed. Best to be in front of either a well manicured broiler house or in front of a family farm sign (without a company logo on it). Please make sure there is a lot of contrast between the subjects and background. Without contrast it will be hard to copy into a booklet format. You may submit either a digital or non-digital photograph. If you wish to submit a digital photograph and your family does NOT have a digital camera, please call your county's Cooperative Extension Office to sign out a camera or talk to your county's Cooperative Extension livestock or horticultural agent to make an appointment to come out and take a picture of your farm. Please include your name, family farm name, and contact information when you send us the jpeg file so we can match up the right picture with the right farm description.

If you wish to submit your farm information via e-mail, please email farm profile information and photograph of your farm in .jpg format to extension.programs@chathamnc.org. If you wish to submit a paper copy of your farm information and a print photograph, please mail to Dan Campeau, Chatham County Center, PO Box 279, Pittsboro, NC 27312-0279, or bring by our office at Chatham Co. Agriculture Building, 45 South Street, Pittsboro. We will not be able to return photographs.

Should you have any questions, please call 919.542.8202 and speak to Dan Campeau.
